

Metafact LLC Capabilities Statement

Metafact is a data solutions consultancy specializing in the design, modernization, and optimization of enterprise data ecosystems for government and commercial clients. Metafact brings over 20 years experience and deep expertise in building scalable, cloud-native, and secure data platforms that drive actionable insights and operational efficiency.

Core Competencies

- Data Architecture & Warehousing: 15+ years designing scalable, high-performance data warehouses using Kimball and cloud-native approaches (AWS, Redshift, SQL Server, etc.)
- ETL Development & Optimization: Expert in ETL/ELT using SSIS, T-SQL, MySQL, and Redshift. Proven in optimizing data pipelines for speed and security.
- Cloud Data Solutions: AWS GovCloud-ready expertise including S3, Athena, Aurora, and Redshift. Experience with cloud migration and strangle pattern modernization.
- Business Intelligence & Reporting: Power BI and SSRS reporting for executive dashboards, operational insights, and compliance.
- Agile Data Delivery: Comfortable with SDLC, Agile, and collaborative work environments to quickly translate business needs into technical delivery.

Differentiators

- Unique blend of scientific rigor and pragmatic delivery — grounded in the scientific method with a strong business acumen.
- Government and enterprise experience including Georgia Department of Revenue, SHL, and LeasePlan.
- Deep expertise across the Microsoft stack & AWS cloud ecosystem: SQL, C#, VB.Net, ETL, Power BI, Cloud Infrastructure, SSIS, Redshift, Glue, S3, Athena, Aurora.
- History of stepping into legacy environments and bringing modernization without disruption.

Past Performance

- Decisive Point Consulting Group: Architected enterprise metadata and schema structures in AWS Redshift to support nationwide data governance efforts.
- LeasePlan USA: Rebuilt cloud-linked SQL Server ETL workflows and dashboards serving national fleet data operations.
- Georgia Dept. of Revenue: Key contributor to Check 21 rollout, processing ~\$5M daily in tax payments, integrating complex datasets into Oracle backend systems.
